

Pre-lacquered boards

Fibraprint is an MDF board (between 2 and 18mm thick) coated by applying a roller with layers of water-based paint. The paints that are used have a really low impact on the environment, therefore Fibraprint is fully recyclable.

Fibraprint is a range of products, each with its own characteristics and applications. Discover the range on the following pages.

Fibraprint

The range of Fibraprint consists of various woodgrain designs and unicolours. When it comes to finishes, you can choose between ultramatte, semimatt and gloss. Its main applications are bottoms of drawers, the rear and interior parts of a furniture piece.
